

Title 14. California Code of Regulations
**Chapter 3. Guidelines for Implementation of the
California Environmental Quality Act**

Article 12. Special Situations

Sections 15180 to 15190.5

15180. Redevelopment Projects

(a) An EIR for a redevelopment plan may be a Master EIR, a program EIR, or a project EIR. An EIR for a redevelopment plan must specify whether it is a Master EIR, a program EIR, or a project EIR.

(b) If the EIR for a redevelopment plan is a project EIR, all public and private activities or undertakings pursuant to or in furtherance of the redevelopment plan shall constitute a single project, which shall be deemed approved at the time of adoption of the redevelopment plan by the legislative body. The EIR in connection with the redevelopment plan shall be submitted in accordance with Section 33352 of the Health and Safety Code.

If a project EIR has been certified for the redevelopment plan, no subsequent EIRs are required for individual components of the redevelopment plan unless a subsequent EIR or a supplement to an EIR would be required by Section 15162 or 15163.

(c) If the EIR for a redevelopment plan is a Master EIR, subsequent projects which the lead agency determines as being within the scope of the Master EIR will be subject to the review required by Section 15177. If the EIR for a redevelopment plan is a program EIR, subsequent activities in the program will be subject to the review required by Section 15168.

Note: Authority cited: Section 21083, Public Resources Code; Reference: Sections 21090 and 21166, Public Resources Code.

[15181. Removed]

15182. Residential Projects Pursuant to a Specific Plan

(a) Exemption. Where a public agency has prepared an EIR on a specific plan after January 1, 1980, no EIR or negative declaration need be prepared for a residential project undertaken pursuant to and in conformity to that specific plan if the project meets the requirements of this section.

(b) Scope. Residential projects covered by this section include but are not limited to land subdivisions, zoning changes, and residential planned unit developments.

(c) Limitation. This section is subject to the limitation that if after the adoption of the specific plan, an event described in Section 15162 should occur, this exemption shall not apply until the city or county

which adopted the specific plan completes a subsequent EIR or a supplement to an EIR on the specific plan. The exemption provided by this section shall again be available to residential projects after the Lead Agency has filed a Notice of Determination on the specific plan as reconsidered by the subsequent EIR or supplement to the EIR.

(c) Fees. The Lead Agency has authority to charge fees to applicants for projects which benefit from this section. The fees shall be calculated in the aggregate to defray but not to exceed the cost of developing and adopting the specific plan including the cost of preparing the EIR.

(e) Statute of Limitations. A court action challenging the approval of a project under this section for failure to prepare a supplemental EIR shall be commenced within 30 days after the Lead Agency's decision to carry out or approve the project in accordance with the specific plan.

Note: Authority cited: Section 21083, Public Resources Code; Reference: Section 65453, Government Code.

15183. Projects Consistent with a Community Plan or Zoning

(a) CEQA mandates that projects which are consistent with the development density established by existing zoning, community plan, or general plan policies for which an EIR was certified shall not require additional environmental review, except as might be necessary to examine whether there are project-specific significant effects which are peculiar to the project or its site. This streamlines the review of such projects and reduces the need to prepare repetitive environmental studies.

(b) In approving a project meeting the requirements of this section, a public agency shall limit its examination of environmental effects to those which the agency determines, in an initial study or other analysis:

(1) Are peculiar to the project or the parcel on which the project would be located,

(2) Were not analyzed as significant effects in a prior EIR on the zoning action, general plan, or community plan, with which the project is consistent,

(3) Are potentially significant off-site impacts and cumulative impacts which were not discussed in the prior EIR prepared for the general plan, community plan or zoning action, or

(4) Are previously identified significant effects which, as a result of substantial new information which was not known at the time the EIR was certified, are determined to have a more severe adverse impact than discussed in the prior EIR.

(c) If an impact is not peculiar to the parcel or to the project, has been addressed as a significant effect in the prior EIR, or can be substantially mitigated by the imposition of uniformly applied development policies or standards, as contemplated by subdivision (e) below, then an additional EIR need not be prepared for the project solely on the basis of that impact.

(d) This section shall apply only to projects which meet the following conditions:

(1) The project is consistent with:

(A) A community plan adopted as part of a general plan,

(B) A zoning action which zoned or designated the parcel on which the project would be located to accommodate a particular density of development, or

(C) A general plan of a local agency, and

(2) An EIR was certified by the lead agency for the zoning action, the community plan, or the general plan.

(e) This section shall limit the analysis of only those significant environmental effects for which:

(1) Each public agency with authority to mitigate any of the significant effects on the environment identified in the planning or zoning action undertakes or requires others to undertake mitigation measures specified in the EIR which the lead agency found to be feasible, and

(2) The lead agency makes a finding at a public hearing as to whether the feasible mitigation measures will be undertaken.

(f) An effect of a project on the environment shall not be considered peculiar to the project or the parcel for the purposes of this section if uniformly applied development policies or standards have been previously adopted by the city or county with a finding that the development policies or standards will substantially mitigate that environmental effect when applied to future projects, unless substantial new information shows that the policies or standards will not substantially mitigate the environmental effect. The finding shall be based on substantial evidence which need not include an EIR. Such development policies or standards need not apply throughout the entire city or county, but can apply only within the zoning district in which the project is located, or within the area subject to the community plan on which the lead agency is relying. Moreover, such policies or standards need not be part of the general plan or any community plan, but can be found within another pertinent planning document such as a zoning ordinance. Where a city or county, in previously adopting uniformly applied development policies or standards for imposition on future projects, failed to make a finding as to whether such policies or standards would substantially mitigate the effects of future projects, the decisionmaking body of the city or county, prior to approving such a future project pursuant to this section, may hold a public hearing for the purpose of considering whether, as applied to the project, such standards or policies would substantially mitigate the effects of the project. Such a public hearing need only be held if the city or county decides to apply the standards or policies as permitted in this section.

(g) Examples of uniformly applied development policies or standards include, but are not limited to:

(1) Parking ordinances.

(2) Public access requirements.

(3) Grading ordinances.

(4) Hillside development ordinances.

(5) Flood plain ordinances.

(6) Habitat protection or conservation ordinances.

(7) View protection ordinances.

(h) An environmental effect shall not be considered peculiar to the project or parcel solely because no uniformly applied development policy or standard is applicable to it.

(i) Where the prior EIR relied upon by the lead agency was prepared for a general plan or community plan that meets the requirements of this section, any rezoning action consistent with the general plan or community plan shall be treated as a project subject to this section.

(1) "Community plan" is defined as a part of the general plan of a city or county which applies to a

defined geographic portion of the total area included in the general plan, includes or references each of the mandatory elements specified in Section 65302 of the Government Code, and contains specific development policies and implementation measures which will apply those policies to each involved parcel.

(2) For purposes of this section, "consistent" means that the density of the proposed project is the same or less than the standard expressed for the involved parcel in the general plan, community plan or zoning action for which an EIR has been certified, and that the project complies with the density-related standards contained in that plan or zoning. Where the zoning ordinance refers to the general plan or community plan for its density standard, the project shall be consistent with the applicable plan.

(j) This section does not affect any requirement to analyze potentially significant offsite or cumulative impacts if those impacts were not adequately discussed in the prior EIR. If a significant offsite or cumulative impact was adequately discussed in the prior EIR, then this section may be used as a basis for excluding further analysis of that offsite or cumulative impact.

Note: Authority cited: Section 21083, Public Resources Code; Reference: Section 21083.3, Public Resources Code.

15184. State Mandated Local Projects

Whenever a state agency issues an order which requires a local agency to carry out a project subject to CEQA, the following rules apply:

(a) If an EIR is prepared for the project, the local agency shall limit the EIR to considering those factors and alternatives which will not conflict with the order.

(b) If a local agency undertakes a project to implement a rule or regulation imposed by a certified state environmental regulatory program listed in Section 15251, the project shall be exempt from CEQA with regard to the significant effects analyzed in the document prepared by the state agency as a substitute for an EIR. The local agency shall comply with CEQA with regard to any site-specific effect of the project which was not analyzed by the certified state agency as a significant effect on the environment. The local agency need not re-examine the general environmental effects of the state rule or regulation.

Note: Authority cited: Section 21083, Public Resources Code; Reference: Sections 21080, 21080.5, and 21154, Public Resources Code.

15185. Administrative Appeals

(a) Where an agency allows administrative appeals upon the adequacy of an environmental document, an appeal shall be handled according to the procedures of that agency. Public notice shall be handled in accordance with individual agency requirements and Section 15202(e).

(b) The decision-making body to which an appeal has been made shall consider the environmental document and make findings under Sections 15091 and 15093 if appropriate.

Note: Authority cited: Section 21083, Public Resources Code; Reference: Sections 21082 and 21083, Public Resources Code.

15186. School Facilities.

(a) CEQA establishes a special requirement for certain school projects, as well as certain projects near schools, to ensure that potential health impacts resulting from exposure to hazardous materials, wastes, and substances will be carefully examined and disclosed in a negative declaration or EIR, and that the lead agency will consult with other agencies in this regard.

(b) Before certifying an EIR or adopting a negative declaration for a project located within one-fourth mile of a school that involves the construction or alteration of a facility that might reasonably be anticipated to emit hazardous air emissions or that would handle an extremely hazardous substance or a mixture containing extremely hazardous substances in a quantity equal to or greater than the state threshold quantity specified in subdivision (j) of Section 25532 of the Health and Safety Code, that may impose a health or safety hazard to persons who would attend or would be employed at the school, the lead agency must do both of the following:

(1) Consult with the affected school district or districts regarding the potential impact of the project on the school; and

(2) Notify the affected school district or districts of the project, in writing, not less than 30 days prior to approval or certification of the negative declaration or EIR.

(c) When the project involves the purchase of a school site or the construction of a secondary or elementary school by a school district, the negative declaration or EIR prepared for the project shall not be adopted or certified unless:

(1) The negative declaration, mitigated negative declaration, or EIR contains sufficient information to determine whether the property is:

(A) The site of a current or former hazardous waste or solid waste disposal facility and, if so, whether wastes have been removed.

(B) A hazardous substance release site identified by the Department of Toxic Substances Control in a current list adopted pursuant to Section 25356 of the Health and Safety Code for removal or remedial action pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(C) The site of one or more buried or above ground pipelines which carry hazardous substances, acutely hazardous materials, or hazardous wastes, as defined in Division 20 of the Health and Safety Code. This does not include a natural gas pipeline used only to supply the school or neighborhood.

(D) Within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor.

(2) The lead agency has notified in writing and consulted with the county or city administering agency (as designated pursuant to Section 25502 of the Health and Safety Code) and with any air pollution control district or air quality management district having jurisdiction, to identify facilities within one-fourth mile of the proposed school site which might reasonably be anticipated to emit hazardous emissions or handle hazardous or acutely hazardous material, substances, or waste. The notice shall include a list of the school sites for which information is sought. Each agency or district receiving notice shall provide the requested information and provide a written response to the lead agency within 30 days of receiving the notification. If any such agency or district fails to respond within that time, the negative declaration or EIR shall be conclusively presumed to comply with this section as to the area of responsibility of that agency.

(3) The school district makes, on the basis of substantial evidence, one of the following written findings:

(A) Consultation identified none of the facilities specified in paragraph (2).

(B) The facilities specified in paragraph (2) exist, but one of the following conditions applies:

1. The health risks from the facilities do not and will not constitute an actual or potential endangerment of public health to persons who would attend or be employed at the proposed school.
2. Corrective measures required under an existing order by another agency having jurisdiction over the facilities will, before the school is occupied, mitigate all chronic or accidental hazardous air emissions to levels that do not constitute any actual or potential public health danger to persons who would attend or be employed at the proposed school. When the school district board makes such a finding, it shall also make a subsequent finding, prior to occupancy of the school, that the emissions have been so mitigated.
3. For a school site with boundary that is within 500 feet of the edge of the closest traffic lane of a freeway or other busy traffic corridor, the school district determines, through a health risk assessment pursuant to subdivision (b)(2) of Section 44360 of the Health and Safety Code, based on appropriate air dispersion modeling, and after considering any potential mitigation measures, that the air quality at the proposed site is such that neither short-term nor long-term exposure poses significant health risks to pupils.

(C) The facilities or other pollution sources specified in subsection (c)(2) exist, but conditions in subdivisions (c)(3)(B)(1), (2) or (3) cannot be met, and the school district is unable to locate an alternative site that is suitable due to a severe shortage of sites that meet the requirements in subdivision (a) of Section 17213 of the Education Code. If the school district makes this finding, the school board shall prepare an EIR and adopt a statement of overriding considerations.

This finding shall be in addition to any findings which may be required pursuant to Sections 15074, 15091 or 15093.

(d) When the lead agency has carried out the consultation required by paragraph (2) of subdivision (b), the negative declaration or EIR shall be conclusively presumed to comply with this section, notwithstanding any failure of the consultation to identify an existing facility.

(e) The following definitions shall apply for the purposes of this section:

- (1) "Acutely hazardous material," is as defined in 22 C.C.R. § 66260.10.
- (2) "Administering agency," is as defined in Section 25501 of the Health and Safety Code.
- (3) "Extremely hazardous substance," is as defined in subdivision (g)(2)(B) of Section 25532 of the Health and Safety Code and listed in Section 2770.5, Table 3, of Title 19 of the California Code of Regulations.
- (4) "Facilities" means any source with a potential to use, generate, emit or discharge hazardous air pollutants, including, but not limited to, pollutants that meet the definition of a hazardous substance, and whose process or operation is identified as an emission source pursuant to the most recent list of source categories published by the California Air Resources Board.
- (5) "Freeway or other busy traffic corridors" means those roadways that, on an average day, have traffic in excess of 50,000 vehicles in a rural area, as defined in Section 50101 of the Health and Safety Code, and 100,000 vehicles in an urban area, as defined in Section 50104.7 of the Health and Safety Code.
- (6) "Handle" means to use, generate, process, produce, package, treat, store, emit, discharge, or dispose of a hazardous material in any fashion.

(7) "Hazardous air emissions," is as defined in subdivisions (a) to (f), inclusive, of Section 44321 of the Health and Safety Code.

(8) "Hazardous substance," is as defined in Section 25316 of the Health and Safety Code.

(9) "Hazardous waste," is as defined in Section 25117 of the Health and Safety Code.

(10) "Hazardous waste disposal site," is as defined in Section 25114 of the Health and Safety Code.

Note: Authority cited: Section 21083, Public Resources Code. Reference: Sections 21151.4 and 21151.8, Public Resources Code.

15187. Environmental Review of New Rules and Regulations

(a) At the time of the adoption of a rule or regulation requiring the installation of pollution control equipment, establishing a performance standard, or establishing a treatment requirement, the California Air Resources Board, Department of Toxic Substances Control, Integrated Waste Management Board, State Water Resources Control Board, all regional water quality control boards, and all air pollution control districts and air quality management districts, as defined in Section 39025 of the Health and Safety Code, must perform an environmental analysis of the reasonably foreseeable methods by which compliance with that rule or regulation will be achieved.

(b) If an EIR is prepared by the agency at the time of adoption of a rule or regulation, it satisfies the requirements of this section provided that the document contains the information specified in subdivision (c) below. Similarly, for those State agencies whose regulatory programs have been certified by the Resources Agency pursuant to Section 21080.5 of the Public Resources Code, an environmental document prepared pursuant to such programs satisfies the requirements of this section, provided that the document contains the information specified in subdivision (c) below.

(c) The environmental analysis shall include at least the following:

(1) An analysis of reasonably foreseeable environmental impacts of the methods of compliance;

(2) An analysis of reasonably foreseeable feasible mitigation measures relating to those impacts; and

(3) An analysis of reasonably foreseeable alternative means of compliance with the rule or regulation, which would avoid or eliminate the identified impacts.

(d) The environmental analysis shall take into account a reasonable range of environmental, economic, and technical factors, population and geographic areas, and specific sites. The agency may utilize numerical ranges and averages where specific data is not available, but is not required to, nor should it, engage in speculation or conjecture.

(e) Nothing in this section shall require the agency to conduct a project level analysis.

(f) Nothing in this section is intended, or may be used, to delay the adoption of any rule or regulation for which this section requires an environmental analysis.

Note: Authority cited: Section 21083, Public Resources Code; References: Sections 21159 and 21159.4, Public Resources Code.

15188. Focused EIR for Pollution Control Equipment

This section applies to projects consisting solely of the installation of pollution control equipment and other components necessary to the installation of that equipment which are undertaken for the purpose of complying with a rule or regulation which was the subject of an environmental analysis as described in Section 15187.

(a) The lead agency for the compliance project may prepare a focused EIR to analyze the effects of that project when the following occur:

(1) the agency which promulgated the rule or regulation certified an EIR on that rule or regulation, or reviewed it pursuant to an environmental analysis prepared under a certified regulatory program and, in either case, the review included an assessment of growth inducing impacts and cumulative impacts of, and alternatives to, the project;

(2) the focused EIR for the compliance project is certified within five years of the certified EIR or environmental analysis required by subdivision (a)(1); and

(3) the EIR prepared in connection with the adoption of the rule or regulation need not be updated through the preparation of a subsequent EIR or supplemental EIR pursuant to section 15162 or section 15163.

(b) The discussion of significant environmental effects in the focused EIR shall be limited to project-specific, potentially significant effects which were not discussed in the environmental analysis required under Section 15187. No discussion of growth-inducing or cumulative impacts is required. Discussion of alternatives shall be limited to alternative means of compliance, if any, with the rule or regulation.

Note: Authority: Section 21083, Public Resources Code; Reference: Section 21159.1, Public Resources Code.

15189. Compliance with Performance Standard or Treatment Requirement Rule or Regulation

This section applies to projects consisting solely of compliance with a performance standard or treatment requirement which was the subject of an environmental analysis as described in Section 15187.

(a) If preparing a negative declaration, mitigated negative declaration or EIR on the compliance project the lead agency for the compliance project shall, to the greatest extent feasible, use the environmental analysis prepared pursuant to Section 15187. The use of numerical averages or ranges in the environmental analysis prepared under Section 15187 does not relieve the lead agency on the compliance project from its obligation to identify and evaluate the environmental effects of the project.

(b) Where the lead agency determines that an EIR is required for the compliance project, the EIR need address only the project-specific issues or other issues that were not discussed in sufficient detail in the environmental analysis prepared under Section 15187. The mitigation measures imposed by the lead agency shall be limited to addressing the significant effects on the environment of the compliance project. The discussion of alternatives shall be limited to a discussion of alternative means of compliance, if any, with the rule or regulation.

Note: Authority cited: Section 21083, Public Resources Code; Reference: Section 21159.2, Public Resources Code.

15190. Deadlines for Compliance with Sections 15188 and 15189

(a) The lead agency for a compliance project under either Section 15188 or Section 15189 shall determine whether an EIR or negative declaration should be prepared within 30 days of its determination that the application for the project is complete.

(b) Where the EIR will be prepared under contract to the lead agency for the compliance project, the agency shall issue a request for proposal for preparation of the EIR not later than 30 days after the deadline for response to the notice of preparation has expired. The contract shall be awarded within 30 days of the response date on the request for proposals.

Note: Authority cited: Section 21083, Public Resources Code; Reference: Section 21159.3, Public Resources Code.

§ 15190.5. Department Of Defense Notification Requirement.

(a) For purposes of this section, the following definitions are applicable.

(1) "Low-level flight path" means any flight path for any aircraft owned, maintained, or that is under the jurisdiction of the United States Department of Defense that flies lower than 1,500 feet above ground level, as indicated in the United States Department of Defense Flight Information Publication, "Area Planning Military Training Routes: North and South America (AP/1B)" published by the United States National Imagery and Mapping Agency, or its successor, as of the date the military service gives written notification to a lead agency pursuant to subdivision (b).

(2) "Military impact zone" means any area, including airspace, that meets both of the following criteria:

(A) Is within two miles of a military installation, including, but not limited to, any base, military airport, camp, post, station, yard, center, homeport facility for a ship, or any other military activity center that is under the jurisdiction of the United States Department of Defense; and

(B) Covers greater than 500 acres of unincorporated land, or greater than 100 acres of city incorporated land.

(3) "Military service" means the United States Department of Defense or any branch of the United States Armed Forces.

(4) "Special use airspace" means the land area underlying the airspace that is designated for training, research, development, or evaluation for a military service, as that land area is established by the United States Department of Defense Flight Information Publication, "Area Planning: Special Use Airspace: North and South America (AP/1A)" published by the United States National Imagery and Mapping Agency, or its successor, as of the date the military service gives written notification to a lead agency pursuant to subdivision (b).

(b) A military service may give written notification to a lead agency of the specific boundaries of a low-level flight path, military impact zone, or special use airspace, and provide the lead agency, in writing, the military contact office and address for the military service. If the notice references the specific boundaries of a low-level flight path, such notification must include a copy of the applicable United States Department of Defense Flight Information Publication, "Area Planning Military Training Routes: North and South America (AP/1B)." If the notice references the specific boundaries of a special use airspace, such notification must include a copy of the applicable United States Department of Defense Flight Information Publication, "Area Planning: Special Use Airspace: North and South America (AP/1A)."

(c) If a military service provides the written notification specified in subdivision (b) of this section, a lead agency must include the specified military contact office in the list of organizations and individuals receiving a notice of intent to adopt a negative declaration or a mitigated negative declaration pursuant to Section 15072, in the list of organizations and individuals receiving a notice of preparation of an EIR pursuant to Section 15082, and in the list of organizations and individuals receiving a notice of availability of a draft EIR pursuant to Section 15087 for any project that meets all of the criteria specified below:

(1) The project to be carried out or approved by the lead agency is within the boundaries specified in subdivision (b).

(2) The project is one of the following:

(A) a project that includes a general plan amendment; or

(B) a project that is of statewide, regional, or areawide significance; or

(C) a project that relates to a public use airport and the area surrounding such airport which is required to be referred to the airport land use commission, or appropriately designated body, pursuant to Sections 21670-21679.5 of the Public Utilities Code.

(3) The project is not one of the actions described below. A lead agency does not need to send to the specified military contact office a notice of intent to adopt a negative declaration or a mitigated negative declaration, a notice of preparation of an EIR, or a notice of availability of a draft EIR for such actions.

(A) a response action taken pursuant to Chapter 6.8 (commencing with Section 25300) of Division 20 of the Health and Safety Code.

(B) a response action taken pursuant to Chapter 6.85 (commencing with Section 25396) of Division 20 of the Health and Safety Code.

(C) a project undertaken at a site in response to a corrective action order issued pursuant to Section 25187 of the Health and Safety Code.

The lead agency shall send the specified military contact office a notice of intent or a notice of availability sufficiently prior to adoption or certification of the environmental documents by the lead agency to allow the military service the review period provided under Section 15105.

(d) The effect or potential effect that a project may have on military activities does not itself constitute an adverse effect on the environment for the purposes of CEQA.

Note: Authority cited: Section 21083, Public Resources Code. Reference: Section 21098, Public Resources Code.
